

Shobhit Shrivastava

Full-Stack Developer | MERN Stack | DevOps | System Design

Bhopal, India • shrivastavashobhit706@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Summary

Full-Stack Developer specializing in modern web applications, cloud-native systems, and AI-powered solutions. Experienced in building scalable products using React.js, Next.js, Node.js, Express.js, MongoDB, Docker, and AWS, with expertise in real-time communication, API architecture, performance optimization and agile methodologies. Passionate about system design, clean engineering practices, and creating seamless user experiences.

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3, SCSS
- **Frontend:** React.js, Next.js, Redux Toolkit, TanStack React Query, Tailwind CSS, GSAP, EJS
- **Backend:** Node.js, Express.js, RESTful APIs, Microservices, Socket.io, WebSockets, JWT Authentication
- **Databases:** MongoDB, Mongoose, Database Indexing, Query Optimization
- **Cloud & DevOps:** Git/Github, Docker, Kubernetes, AWS (ECS, ECR, EC2), CI/CD Pipelines
- **AI & Intelligent Systems:** LangChain, Generative AI Integration, Pinecone (Vector DB), RAG, LLMs

Projects

Echo.AI - Next-Gen AI Chat App

[GitHub](#) | [Live](#)

- **Tech Stack:** Next.js, React, Redux, Node.js, Express.js, MongoDB, Mistral AI, LangChain, Pinecone, Tavily, Docker
- Developed a full-stack chat application utilizing Server-Sent Events (SSE) to stream AI responses chunk-by-chunk, reducing perceived response wait time by **85%** (Time-to-First-Token < **200ms**).
- Engineered a document QA pipeline using Pinecone vector database; parsed uploads into **1000-character chunks** with a **20% overlap** and generated **1024-dimension embeddings** for precise semantic search.
- Integrated Tavily AI web search to automatically retrieve the top **5 live web sources** when local document context is missing, solving the problem of LLM knowledge cutoffs and hallucinations.

FlexIt - Real-Time Social Media Platform

[GitHub](#) | [Live](#)

- **Tech Stack:** React, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.io, ImageKit CDN, Docker
- Engineered a real-time messaging system using Socket.io and MongoDB, delivering direct messages instantly in under **100ms** while eliminating HTTP polling overhead.
- Optimized media processing and page load speeds by **40%** via ImageKit CDN integration and lazy-loading video posts using the Intersection Observer API.
- Implemented secure dual-method login (Google OAuth 2.0 and local JWT via HTTP-only cookies) and modularized deployment with Docker containerization.

Momentum - Squad Productivity & Consistency App

[GitHub](#) | [Live](#)

- **Tech Stack:** Next.js, React, Node.js, Express.js, MongoDB, Mongoose, Passport.js, Tailwind CSS v4, PWA
- Developed a social productivity app that drives team consistency by tracking squad task completion rates (Win Rates) and streaks on a shared daily feed.
- Designed a daily **"Midnight Purge"** system that automatically marks unfinished tasks as failed at midnight, ensuring **100%** honest consistency tracking.
- Built a Progressive Web App (PWA) with service worker caching for 100% offline access, featuring **voice-to-text task creation** and haptic feedback.

Internships

Web Developer Intern, Database Cloud Education & Development Pvt. Ltd.

[April 2023](#)

- Collaborated in an Agile team framework to deliver 3 performance-driven web projects using ES6+ and RESTful APIs, utilizing advanced debugging and unit testing workflows to optimize application code latency by **15%**.

Education

Bachelor of Technology (B.Tech) - Computer Science and Engineering

[2021 - 2025](#)

Truba Institute of Engineering and Information Technology, (RGPV University), Bhopal, India

CGPA: 7.1/10
